

Rochester, MN—Today, Congressman Tim Walz visited Prosthetic Laboratories of Rochester to tour their facility and learn firsthand about innovative practices in the prosthetic industry taking place right here in southern Minnesota.

“It’s encouraging to see businesses like Prosthetic Laboratories of Rochester that are able to provide high quality, patient-centered care for members of the community, including our brave wounded warriors,” said Walz. “I am here today to see firsthand the work Prosthetic Laboratories is doing to help their clients and to speak with them about new, innovative practices in their field.”

““We are happy to host Congressman Walz today and introduce him to some of the innovations we are doing here at Prosthetics Laboratories, and share with him our unique approach to patient care,” said Mike Gozola, co-founder of Prosthetic Laboratories.

[Prosthetic Laboratories of Rochester, Inc.](#) was founded in 1984 by Steve Amundson and Mike Gozola and have over a dozen locations throughout the Midwest that strive to provide high-quality, patient-centered care while utilizing innovative medical technology.
